1/33 Argo Drive,
Auckland, 2012

I'm a full-stack web developer and a recent graduate of Bootcamp course at Dev Academy. Through working on multiple group projects, I'm familiar with how real world development projects work and feel confident collaborating in team environments.

During my time at the University of Auckland studying computer science, I was always fascinated to see code come to life on a webpage, and my interest in programming grew rapidly. I particularly enjoy building user interfaces and working with front-end technologies.

Outside of coding, I enjoy bouldering and various puzzles, both of which naturally brings strong problem-solving mindset and are part of what align me to software development. I'm always eager to learn and grow as a developer, and I'm especially drawn to this field because it constantly challenges me to keep learning and improving.

Employment History

Online Helpdesk Support

Entrust

September 2023 – December 2023

- Managing the dividend disbursements for Auckland Vector customers
- Interacting with customers regarding dividend matters through emails
